***DETAILED ACTION***

***Priority***

Receipt is acknowledged of paper submitted under 35 U.S.C. 119(a)-(d), claiming priority from U.S. Patent Application No. 10/219249 filed on August 16, 2002 which itself claims priority from Japanese Patent Application No. 2001-251897 filed on August 22, 2001 which papers have been placed of record in the file.

***Continued Prosecution Application***

The request filed on 12/09/2003 for a Divisional Application (DA) based on parent Application No. 10/219249 is acceptable and a DA has been established. An action on the DA follows.

***Information Disclosure Statement***

Acknowledgment is made of receipt of Applicant's Information Disclosure Statement (PTO-1449) filed on 12/09/2003.

The references on PTO 1499 submitted on 12/09/2003 are acknowledged. All the cited references have been considered.

However the foreign patents and documents cited by applicant are considered to the extent that could be understood from the abstract and drawings.

***Preliminary Amendment Status***

Acknowledgment is made of entry of preliminary amendment filed 12 /09 /  
.2003.

Therefore claim 6 is the only currently pending claim.

Claims 1-5 and 7 have been cancelled by the preliminary amendment.

***Reasons for allowance***

Claim 6 is allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitation of the dependent claims, in such manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims, which include the method of making the semiconductor device as recited in claim 6 including an impurity diffusion layer that pierces the silicon substrate and extends from said second semiconductor layer from an surface of said second semiconductor layer opposite to said first semiconductor layer to a surface of said first semiconductor layer contacting said second semiconductor layer, and wherein the wire only crosses the impurity diffusion layer at its second end. ( for device claims see USP No. 6,686,634).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
